

dataset samples: 1000
default hyperparameters

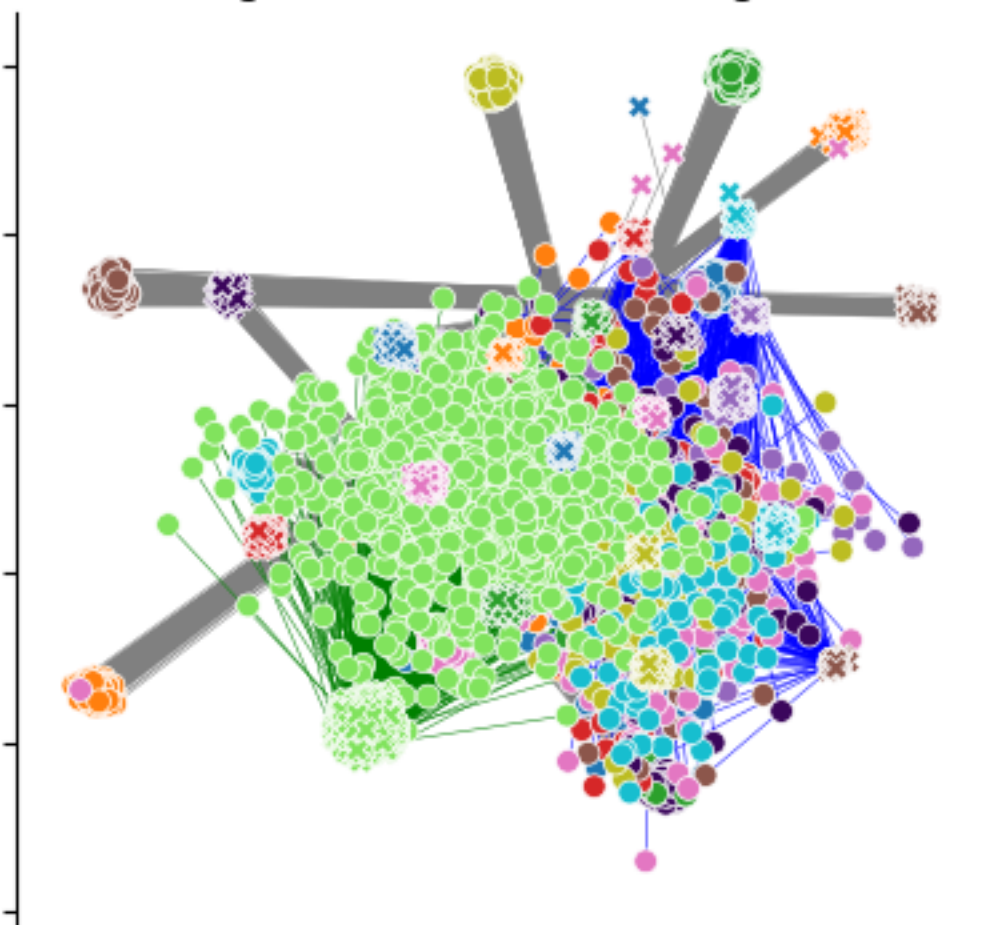

metric: msdist across class means
alignment method: unaligned

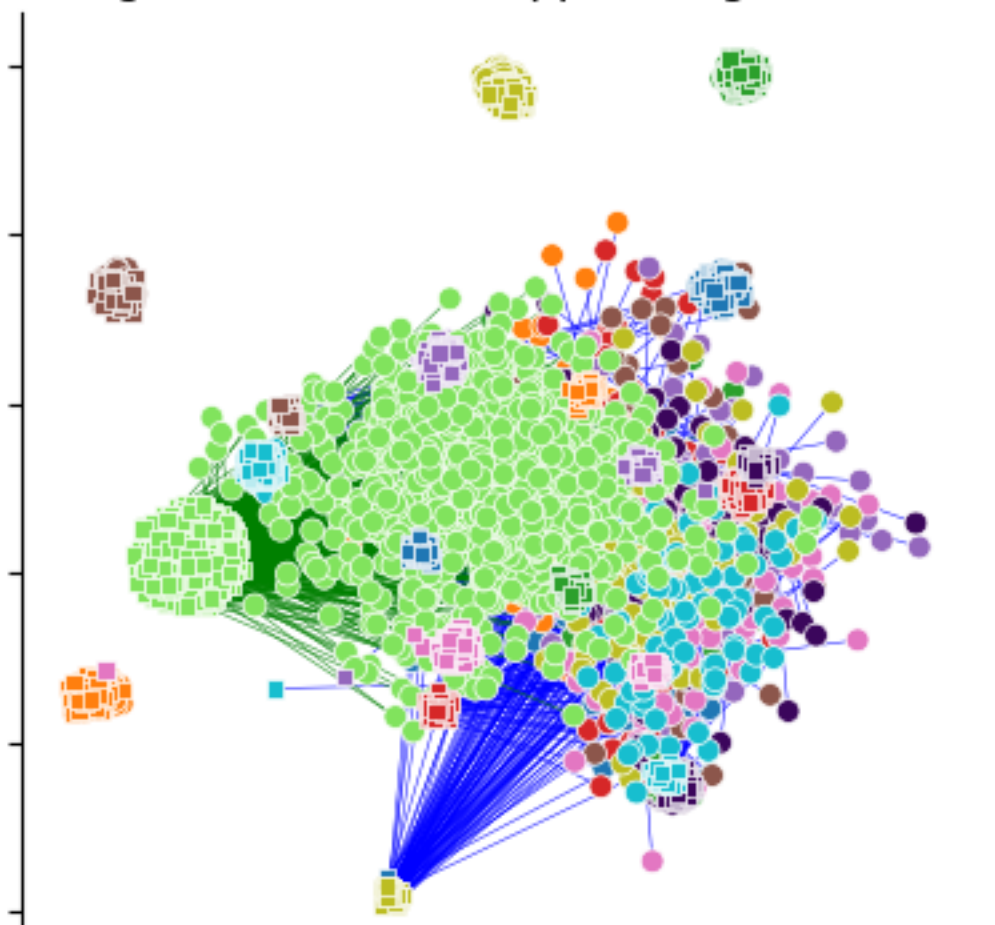

metric: msdist across class means
alignment method: approx aligned UMAP

metric: msdist across all projecitons
alignment method: unaligned

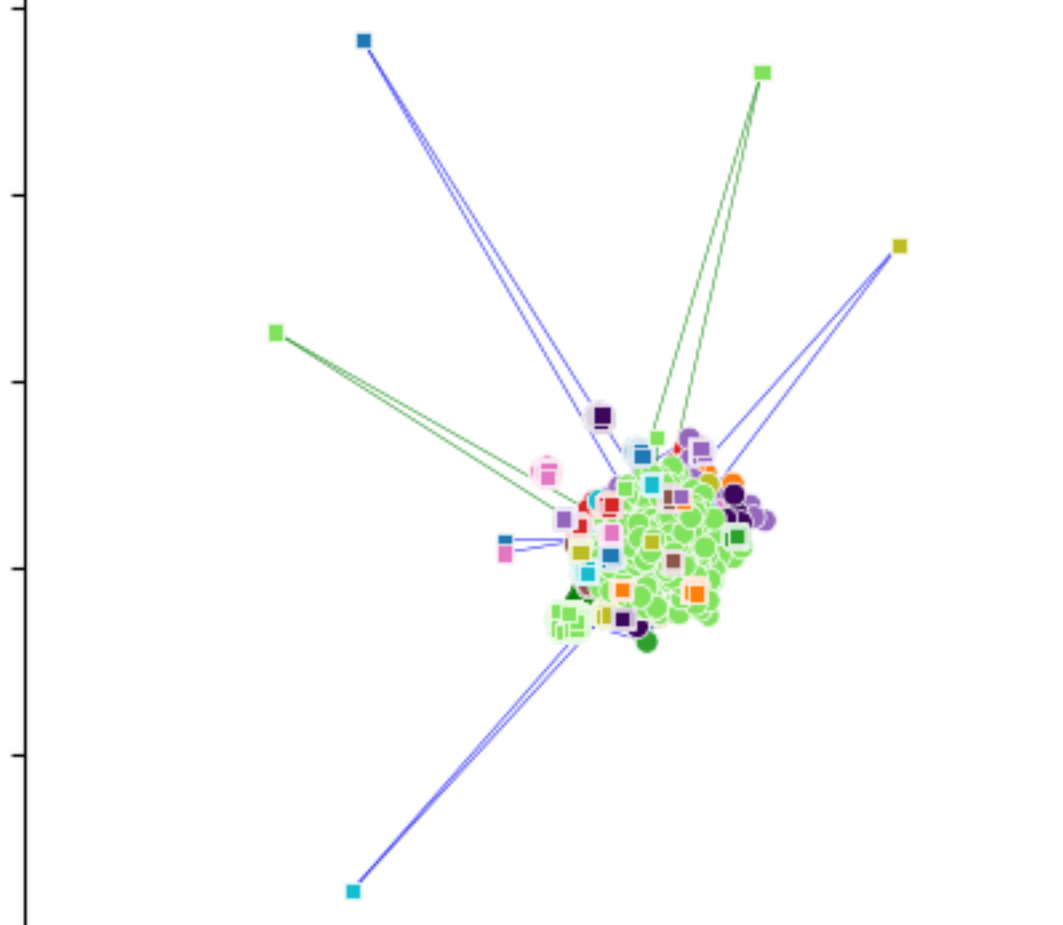

metric: msdist across all projecitons
alignment method: approx aligned UMAP

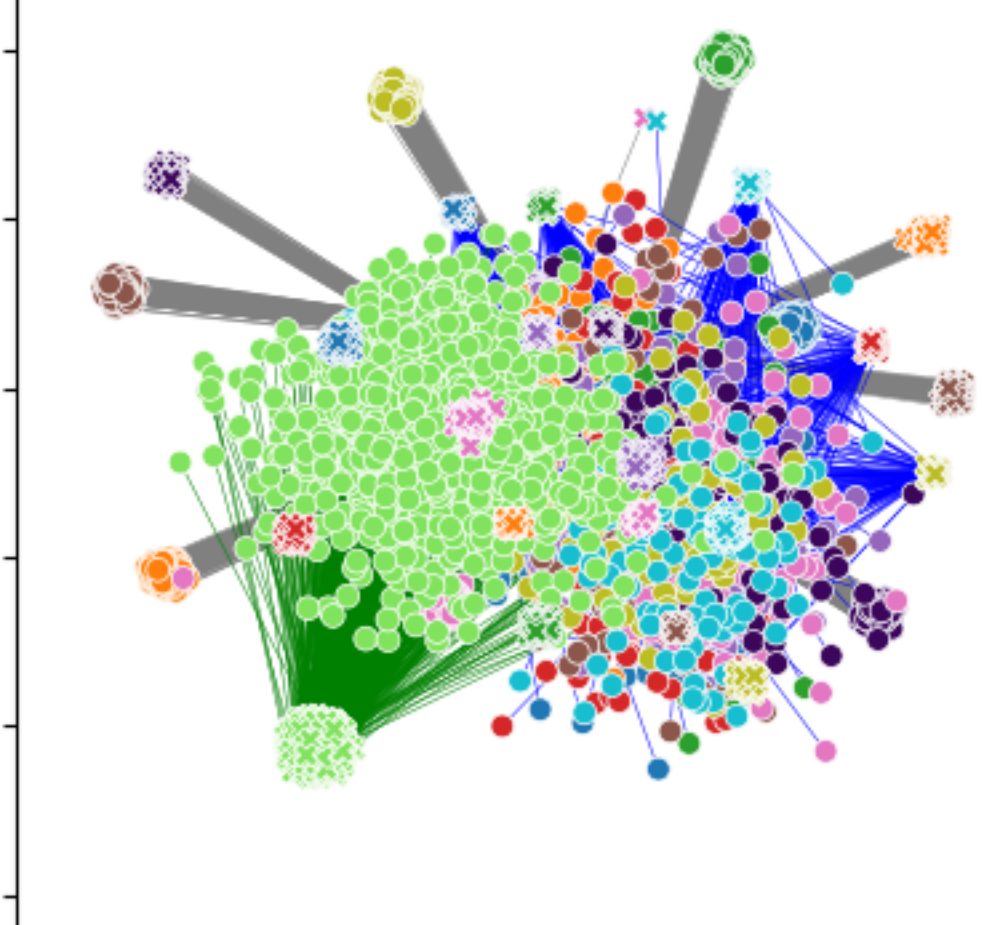

dataset samples: 1000
optimal hyperparameters

metric: msdist across class means
alignment method: approx aligned UMAP

metric: msdist across all projecitons
alignment method: unaligned

metric: msdist across all projecitons
alignment method: approx aligned UMAP
